## PROJECTS

### Real time project

#### [BaiManus.in](#)

[Baimanus.in](#) is an innovative news web application developed by MGM University to streamline and enhance the delivery of news and community-driven content. Designed with a focus on leveraging modern technologies, the platform provides seamless user experiences, efficient functionality, and reliable access to real-time information.

### Academic project

#### Room Finders WebApplications

Room Finders is a modern platform designed to simplify the process of finding and renting rooms, apartments, or shared accommodations. The app bridges the gap between property owners and tenants by offering a seamless and efficient solution for room discovery, booking, and management.
